Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant argues methanol does not adjust pH, but depends on the monomer of the composition. Examiner stated that Suzuki comprises the same monomer as Applicant. Applicant argues the claimed invention has unexpected results over the prior art based on previously submitted Declaration and page 10, line 15 and page 16 example of the instant specification showing a pH of 4.5 to 6.8 based on the acidity or basicity of the monomers or oligomers. Applicant argues amendment after final (Paper No. 9) was submitted to overcome 112 issues. Examiner notes that claim 9, which is not specifically addressed in the 112 rejection has been amended after final, which adds the claim language '...formed by curing the ultraviolet-curable composition of claim 5' which is held as a product by process claim limitation. Examiner additionally notes product-by-process claim limitations are given little patentable weight in product claims..
